🏆 Codeforces 📺 GFG

Professional Summary

Highly motivated B.Tech Computer Science student with a strong foundation in Data Structures, Algorithms, and Full-Stack Development. Passionate about competitive programming with a track record of high rankings on global platforms like LeetCode and CodeChef. Proficient in building scalable web applications using the MERN stack and dedicated to solving complex real-world problems through efficient, high-quality code.

Education

Vignan's Institute of Information Technology
B.Tech in Computer Science (CGPA: 8.96/10.0)

Sept 2023 – June 2027

Projects

URL Shortener — *React.js, Node.js, Express.js, MongoDB*

- Engineered a scalable URL shortening service capable of handling high-volume link redirection.
- Developed custom alias generation logic to allow users to create personalized shortened links.
- Integrated comprehensive analytics dashboard to track click counts, user device, and geographical data.
- Implemented RESTful API architecture for seamless communication between frontend and backend.
- Utilized MongoDB indexing to optimize query performance and ensure sub-second redirection latency.

X-Clone — *React.js, Node.js, Socket.io, Tailwind CSS*

- Designed and developed a full-stack social media platform mirroring key X (Twitter) functionalities.
- Enabled real-time bidirectional communication for live notifications and activity feeds via Socket.io.
- Implemented complex features like post creation, likes, comments, and real-time follower/following logic.
- Architected a highly responsive and aesthetic UI using Tailwind CSS for a seamless user experience.
- Optimized state management and component rendering in React to ensure smooth navigation under load.

Tenzies Game — *React.js, JavaScript, HTML, CSS*

- Developed an interactive game focusing on component-based architecture
- Implemented core game logic using dice rolling, number locking, win condition checks
- Designed a responsive and intuitive user interface ensuring compatibility across devices
- Utilized React hooks to manage state and side effects, enhancing user experience

Technical Skills

Languages: C, C++, Java, HTML, CSS, JavaScript

Frameworks & Libraries: Node, Express, React

Developer Tools: Github, Visual Studio Code, Postman, Cloudinary

Databases: MySQL, MongoDB

Achievements

- **Igniterra (Unstop):** Ranked 2nd in a college-level Competitive Programming contest.
- **CodeChef:** Achieved 3-star rating (Max: 1718) with participation in over 100 contests.
- **LeetCode:** Earned Knight Badge (Top 3%) with a highest rating of 1937.
- **Codeforces:** Achieved Specialist Rank with a highest rating of 1442.
- **CodeBlitz:** Ranked 3rd in a college-level Competitive Programming contest.
