Education

Vignan's Institute of Information Technology

2023 – Expected 2027

B.Tech, Computer Science and Engineering | CGPA: 9.26

Experience

Freelance Backend Developer | Vignan's Institute of Information Technology (VIIT) March 2026

Paid contract project | Live: viitcet.vignaniit.edu.in

- Delivered a paid mock-exam platform for 600+ students across 10 exams, using a Node.js, Express, and PostgreSQL backend with RBAC for admins, proctors, and students.
- Tracked and auto-flagged exam malpractice in real time via custom RESTful APIs with threshold-based termination.
- Automated result emails and live leaderboards with real-time score endpoints.

Projects

ChatNode | MERN Stack, Socket.io, Tailwind CSS

December 2025

Live: chatnode-mq8l.onrender.com

- Built real-time messaging with Node.js, Express, and Socket.io, validated with 4 concurrent users in testing.
- Secured HTTP and WebSocket sessions using JWT auth with role-based middleware.
- Integrated Cloudinary, Resend, and Arcjet for uploads, email, and rate limiting.
- Built a responsive UI with React, Zustand, Tailwind CSS, and DaisyUI.

AI-Powered SaaS | Next.js, TypeScript, NeonDB, Prisma

May 2026

GitHub: github.com/Charanteja2006/AI-POWERED-SAAS

- Cut media file size by 30% across test uploads using Cloudinary AI for compression, thumbnails, and cropping.
- Secured API routes and tracked upload metadata via Clerk auth and Prisma ORM.
- Built a real-time compression analytics dashboard with Tailwind CSS and DaisyUI.

RENT IT | Node.js, Express, MongoDB

October 2025

GitHub: github.com/Charanteja2006/RentIt

- Built a rental marketplace backend with 6 RESTful API endpoints for auth, products, and rentals.
- Secured user data via encrypted, JWT-based registration and authentication.
- Fixed CORS and JSON formatting bugs across all endpoints through Postman testing.

Technical Skills

Core CS: Data Structures & Algorithms (Trees, Graphs, Dynamic Programming, Recursion), RESTful API Design

Languages: C++, Python, JavaScript, TypeScript, HTML/CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Prisma ORM

Databases: MySQL, MongoDB, PostgreSQL, NeonDB

Tools: Git, GitHub, Postman

Achievements

- Achieved a 3-star rating on CodeChef, reflecting consistent competitive problem-solving under timed constraints.
- Solved 1,000+ problems across LeetCode, CodeChef, HackerEarth, and Codeforces.
- Achieved Knight rank on LeetCode (Global Rank: 28,333; Contest Ranking: 1,937) through sustained contest performance.
- Secured 1st place in a state-level carrom tournament, demonstrating strategic thinking and focus under competitive pressure.
